Career Objective

Seeking a Full Stack/Web Development role to leverage expertise in JavaScript, React.js, Node.js, and SQL to develop scalable web applications and drive organizational success.

Skill

Programming Languages : Python, JavaScript
Web Technologies : HTML, CSS, Bootstrap, DOM, Tailwind CSS
Frameworks & Libraries : React.js, Node.js, Express.js
Databases : MySQL, MongoDB
Developer Tools : Git, GitHub, Postman, VS Code

Project

Driver Booking Platform (MERN Stack)

- Built a real-time driver booking app featuring booking, chat, live tracking, and payments.
- Implemented auth and role-based dashboards (User/Driver/Admin)
- Solves a real-world mobility use case (Uber-like model)

Mannati Infratech Website (MERN Stack)

- Developed a corporate website with admin panel to manage projects and events
- Built enquiry/contact system for client leads
- Designed a responsive and professional UI

The Brilliant Bihar – UPSC/BPSC Learning Platform (Contributor)

- Developed Resource Module (Mock Interviews, PYQ, NCERT, Magazines)
- Structured learning content with notes & chapter-wise tests
- Contributed to a live ed-tech platform for UPSC/BPSC aspirants

Job Prediction Platform (MERN Stack)

- Built an AI-based platform that predicts suitable job roles from user education & skills
- Implemented profile creation, resume upload, and automated job recommendations
- Provided career guidance based on prediction results

Keeper App (React.js**) –** Implemented a note-keeping web app inspired by Google Keep using ReactJS components and state management. Live

Experience

Full Stack Intern | ***MetConnect Infotech Pvt. Ltd*** | Jan 2026 – Present

- Working as a Full Stack Intern developing real-world web applications using the MERN stack
- Building scalable features for a live driver booking platform (real-time modules, APIs, dashboards)
- Developed and integrated frontend components and backend APIs for production projects
- Collaborating in real client projects, solving practical business problems
- Gained hands-on experience in authentication, REST APIs, database design, and deployment

Full Stack Intern | ***Infosys Springboard*** | Nov 2025 – Feb 2026

- Working on an AI-based Job Prediction web application using Python, SQL, and ML preprocessing techniques.
- Developing a full-stack system (React, Node.js, Express.js) with secure authentication.
- Implementing protected routes, user profiles, and prediction APIs for role recommendations.

Education

Bachelor of Technology (2022–2026) - SR Institute of Management and Technology, Lucknow

Certifications

- Completed "The Complete Full Stack Web Development Bootcamp" course on **Udemy**
- AWS Cloud Foundations – Certified by **Amazon Web Services.**
- Completed 12 prerequisite certification courses – **Infosys Springboard**
- Participated in a national-level coding challenge by **Naukri Campus**
- Participated in an Intra-college **Hackathon**
- Certificate of Accomplishment by **HackerRank** - Python (Basic)
